RONNIE MWOLOZI

SOFTWARE ENGINEER | FULL-STACK & BACKEND DEVELOPER

Kampala, Uganda | LinkedIn Profile | GitHub

PROFESSIONAL SUMMARY

Results-driven **Software Engineer** specializing in full-stack web and cross-platform mobile development. Experienced in building robust RESTful APIs with Python (FastAPI, SQLAlchemy), designing responsive web interfaces (Tailwind CSS, JavaScript), and developing mobile applications with Flutter and Dart. Strong foundation in cloud deployments, database management, and AI data operations, backed by a proven track record of delivering end-to-end client solutions.

TECHNICAL SKILLS

Programming Languages	Python, Dart, JavaScript (ES6+), C/C++
Backend & APIs	FastAPI, Pydantic, SQLAlchemy, RESTful API Design
Frontend & Mobile	Flutter, HTML5, CSS3, Tailwind CSS, Vanilla JavaScript
Databases & Tools	MySQL, PostgreSQL, SQLite, Git, GitHub, GitKraken, OpenCV
Deployment & DevOps	Render, Vercel, Railway, Namecheap DNS Setup, CI/CD Pipelines
Core Competencies	Systems Architecture, Data Labeling & AI Annotation, Network Diagnostics (Nmap)

PROFESSIONAL & CLIENT PROJECTS

Airfrost Engineering Solutions Website & Business Profile

Role: Lead Developer & Systems Integrator

Tech Stack: HTML5, Tailwind CSS, Vanilla JavaScript, Resend API, Namecheap DNS

- Designed and deployed the official responsive corporate website for Airfrost Engineering Solutions.
- Integrated the **Resend API** for automated email communication and configured custom domain DNS routing.
- Registered and optimized the company's Google Business Profile and verified indexing on Google Search Console.

Cloud-Hosted Custom Music Application

Role: Full-Stack Developer

Tech Stack: Python, WebSockets, Railway, HTML/CSS

- Architected and deployed a custom web-based audio streaming application hosted on **Railway**.
- Implemented client-server state synchronization for real-time playback control and user interactions.

Algorithmic Trading Strategy & Market Analysis Engine (IN DEVELOPMENT)

Role: Software Developer

Tech Stack: Python, Data Analysis Libraries

- Developing automated market-structure analysis models focused on Daily Break of Structure (BOS) signals.
- Implementing quantitative risk-management rules and risk-to-reward calculators to support structured trade-execution decisions.

CERTIFICATIONS & TRAINING

- **Essentials of Data Labeling & Annotation for AI Development** — *DataLens Africa Academy*
- **Agile Project Management** — *HP LIFE*
- **CS120: Bitcoin for Developers** — *Saylor Academy*
- **Introduction to Digital Business Skills & Social Media Marketing** — *HP LIFE*
- **AWS Certified Cloud Practitioner (Readiness & Architecture Training)** — *AWS*

EDUCATION

Diploma in Software Engineering

Uganda Institute of Information and Communications Technology (UICT) — Kampala, Uganda

Uganda Advanced Certificate of Education (UACE)

Kololo Senior Secondary School — Uganda

Uganda Certificate of Education (UCE)

St. Stephen Secondary School — Mukono, Uganda
